# Introduction
- Good practice in teaching reading
- How to use this book

## Section One: The reading curriculum
- Reading to children
- Recommended teaching approaches: Reading aloud
- Choosing texts to read aloud
- Re-telling familiar stories
- Recommended teaching approaches: Vignette Year 1 - Learning by heart
- The power of song
- Recommended teaching approaches: Vignette Year R - Hearing language patterns
- Reading with children
- Recommended teaching approaches: Shared Reading
- Teacher modelling: thinking aloud
- Guided Reading
- Assessment and grouping of children
- Target setting
- Planning for Guided Reading
- Recommended teaching approaches: Case Study Year R - Guided Reading
- Reciprocal reading
- Evaluation
- Reading by children
- Independent Reading
- Creating a supportive reading environment
- Recommended teaching approaches: Independent tasks
- Reading at home

## Section Two: What the reading process involves
- Early concepts about print
- Teaching print concepts
- Teaching one to one correspondence
- Recommended teaching approaches: Vignette Year R - Teaching print concepts
- Teaching meaning
- Recommended teaching approaches: Vignette Year R - Using meaning cues
- Teaching structure - grammar
- Teaching structure - punctuation
- Recommended teaching approaches: Vignette Year R - Teaching grammatical structure and punctuation
- Teaching visual information
- Teaching phonics
- The terminology of phonics
- Recommended teaching approaches: Graphic Information
- Early progression in sources of information
- Teaching reading strategies
- Recommended teaching approaches: Vignette Year R - Cross checking self-monitoring and self-correcting
- Teaching reading behaviours
- Recommended teaching approaches: Vignette Year R - Developing fluency and phrasing
- Children who experience difficulty with reading
- Recommended teaching approaches: Supporting children who are experiencing difficulties with reading
Section Three  Comprehension  
Moving to deeper understanding  
Structural features of text  
Vocabulary  
Prior knowledge or experience  
Grammatical skills  
Teaching reading comprehension  
Summarising  
Recommended teaching approaches Vignette Year R Summarising  
Vignette Year 1 Summarising  
Vignette Year 2 Summarising  
Predicting  
Recommended teaching approaches Vignette Year R Predicting  
Vignette Year 1 Predicting  
Vignette Year 2 Predicting  
Visualising  
Recommended teaching approaches Vignette Year R Visualising  
Vignette Year 1 Visualising  
Vignette Year 2 Visualising  
Questioning  
Literal questions  
Opinion-related questions  
Inferential questions  
Recommended teaching approaches Vignette Year R Questioning  
Vignette Year 1 Questioning  
Vignette Year 2 Questioning  
Connecting  
Recommended teaching approaches Vignette Year R Connecting  
Vignette Year 1 Connecting  
Vignette Year 2 Connecting  
Inferring  
Recommended teaching approaches Vignette Year R Inferring  
Vignette Year 1 Inferring  
Vignette Year 2 Inferring  

Section Four  Assessing Reading  
Types of assessment  
Assessment at different stages of reading progress  
What needs to be assessed?  
Collecting evidence  
Guided Reading records  
Running records  
Taking a running record  
Three levels of analysis of a running record  
Case study Assessing Bradley’s and Suzy’s reading - moving into instruction  
The phonics check  
In summary

Introduction

Reading is a skill we use every day. Whether a road sign, or a novel, at the supermarket or the library, reading is an integral part of our lives. It is not merely a functional tool to meet the demands of society but a mechanism by which we can acquire knowledge and new ideas, gaining a greater understanding of the world around us. It opens the door to a feast of imagination and creativity which provides enjoyment to reader and author alike.

As long ago as 1998 the National Literacy Strategy (DfEE, 1998), through the Framework for Teaching, introduced the notion of the Searchlights model of reading (Figure 1). This represents the reading process as involving four strategies or ‘searchlights’. In this model, readers use four sources of knowledge to support decoding and understanding of the text:

- phonics knowledge (sounds and spelling)
- grammatical knowledge
- word recognition and graphic knowledge
- knowledge of context.

By 2006 the government had introduced the concept of the ‘simple’ view of reading (Gough and Tunmer, 1986: Rose, 2006). Gough and Tunmer emphasised that decoding and comprehension must both be present if children are to read for meaning. Rose (2006) expressed this diagrammatically (see Figure 2) as a means of identifying differences in the balance between decoding and comprehension.

However, reading is not a ‘simple’ task. Word identification may well involve comprehension, particularly where words such as ‘read’ or ‘sow’ are involved. And reading is, of course, much more than word identification. It is a complex interaction between reader and writer that requires children to develop a range of information, strategies and behaviours which they can use independently, a knowledge and understanding of the world and a rich and broad vocabulary that they can bring to texts they read.

If children are to progress as readers, schools will need to provide key elements of good practice. At the heart of this is a strong emphasis on oral language development, which is particularly crucial in the early stages of reading.
Good practice in teaching reading

Good practice includes highly trained, effectively deployed staff with sound subject knowledge, a consistent approach across each year group and throughout the school and quality resources which are well organised. In addition, good practice requires rigorous assessments which are used effectively, daily reading sessions based on assessed needs and close monitoring of the assessment and teaching of reading throughout the school. Storytime, reading to children, literacy rich environments, including book corners, also play a key role and a high level of parental involvement is essential.

Underpinning all of these elements, there needs to be a broad and rich reading curriculum which engages teachers and children alike - a curriculum which builds on children’s own experiences and interests, makes use of the environment and fosters an atmosphere in which all languages, dialects and traditions are valued - a curriculum that promotes a positive reading ethos throughout the school.

In line with these principles for good practice, this book is designed to fit with the national curriculum for English which stresses skilled word reading involving ‘both the speedy working out of the pronunciation of unfamiliar printed words (decoding) and the speedy recognition of familiar printed words’ (DfE, 2014: 14) in partnership with knowledge of language, and of the world, to support comprehension. The approach to comprehension in this book aligns with the NC statement that:

Comprehension skills develop through pupils’ experience of high-quality discussion with the teacher, as well as from reading and discussing a range of stories, poems and non-fiction. All pupils must be encouraged to read widely across both fiction and non-fiction to develop their knowledge of themselves and the world they live in, to establish an appreciation and love of reading, and to gain knowledge across the curriculum. (DfE, 2014: ibid.)

Learning to read should not be regarded as a hierarchy of skills from lower to higher order, but as a developmental language process. The approaches in the initial stages will colour the children’s motivation and their perception of reading as a purposeful and valuable activity. (Clark, 2014: 12)

Language is the tool through which ideas are stored in memory. For these reasons oral language is the basis of interpreting print. As a general rule anything children have difficulty saying cannot be easily read. There is usually a close relationship between a child’s growth in oral language and his [sic] progress in reading. (Hildreth, 1959: 566)
While many children in the UK bring knowledge of a language - or languages - other than English, the teaching suggestions work equally well with bi-/multilingual children or English first language speakers and the advice to parents has been developed in multilingual communities.

Each section of the book is designed to align with and enhance the reading requirements of national curriculum. However, although the national curriculum follows a year-by-year programme, the underlying view of this book is that learning to read is best seen as a developmental continuum, not necessarily tied to year groups.

This book offers practical guidance to those wishing to provide a full rich reading curriculum for children whilst ensuring that they meet the statutory requirements of the national curriculum for English. For that reason, although the curriculum emphasises phonics teaching and learning, the material presented here goes well beyond that element in taking a holistic view of what becoming a reader involves. This view is founded on three key elements in the reading process:

- semantic (meaning), syntactic (sentence structure) and graphophonic (sound symbol correspondence).

All these sources of information need to be systematically taught to support children to:

- understand that reading has to make sense
- gain knowledge of sentence grammar and punctuation
- get to grips with visual information – the print on the page (grapheme/phoneme correspondences and other letter patterns including high frequency words)

as well as developing a range of reading strategies and behaviours.

**How to use this book**

Each section deals with essential parts of provision for reading. It need not be read in any particular order.

The first section *The reading curriculum* gives an overview of all aspects of teaching reading.

Section Two gives the details of *What the reading process involves*, from early concepts about print through to developing fluency.

Section Three *Comprehension* looks at all the skills needed for successful understanding, with vignette examples of sessions for each of Reception, Year 1 and Year 2 to support teaching.

The final section *Assessment of reading* provides step-by-step guidance for keeping informed assessments and records of progress.

Throughout the book there are key teaching points, some of them vignettes, drawn from examples of good practice and key questions to help focus on providing good practice. A glossary of terms is supplied at the end of the book.
Sources of Information for word identification

Meaning (semantic: pictures and context)  Does it make sense?
Structure (syntactic: grammar and punctuation)  Does it sound right?
Visual (graphophonic: phonics and graphic representation)  Does it look right?

Strategies (processing information)
• self-monitoring
• self-correcting
• re-reading
• reading on
• cross checking
• searching for more information
• orchestrating all sources of information.

Behaviours
• understanding that English print goes left to right
• reading fluently without finger pointing
• reading longer phrases and more complex sentences
• reading silently most of the time.

Sources of information, strategies and behaviours also support understanding.

Acknowledgements

I should like to acknowledge permission to use material developed by Barking and Dagenham Primary and Secondary English Teams. Material from the Reading Recovery Programme, developed in New Zealand, England and the USA have been an important source in putting this book together. Many thanks to all those people who have extended my knowledge and influenced my thinking, particularly my colleagues Sue Matthews, Jo Smith and Gill Stringer, for their generosity in sharing ideas so freely. Thanks are also due to Sue Bodman, Henrietta Dombey and Angela Hobsbawm for their helpful comments and to Seren Freestone, Rebecca Kennedy, David Reedy and Carolyn Swain. Especial thanks to Eve Bearne.
