Teaching Spelling 6-11: designing effective learning in English and across the curriculum

Contents

Chapter 1 Introduction: Teaching Spelling 1

Chapter 2 How do children learn to spell? 3
Teachers’ beliefs about how spelling is learned 4
Rote-visual memorisation 4
The generalisation approach 5
The developmental approach 6
The repertoire approach 6

Chapter 3 What do learners need to know about words? 8
Layers of information in words 8
Sources of knowledge about words 9

Chapter 4 Principles for designing the spelling curriculum 14
Providing authentic writing experiences 14
Being enthusiastic and curious teachers 15
Building children’s linguistic knowledge 15
Presenting spelling as a problem-solving process 16
Providing extended time to look, talk and think about words 16
Allowing children time to practise and revisit learning 17

Thank you to all the teachers and children who have shared their views on spelling and who gave their permission for their comments and photographs to be used in this Minibook. Special thanks go to the teachers and pupils of Arundel Court Primary School. Pseudonyms have been used throughout.
Chapter 1

Introduction: Teaching Spelling

This book is about the learning and teaching of spelling in the primary classroom. It brings together findings from a range of sources and proposes how to design a spelling curriculum in which children explore the requirements of the National Curriculum (DfE, 2013) and make good progress in spelling. It is likely to be of most use to teachers of pupils from Y2 to Y6 as the strategies presented most naturally fit the curriculum requirements for these year groups. It considers the skills children need to develop a sound understanding of spelling conventions and patterns, and how these can be presented to children in ways which encourage both active engagement and memorable learning.

Research, as well as classroom experience, indicates that a lack of competence in spelling can cause several problems to young writers. They may feel embarrassed or frustrated. This may lead them to write fewer words and create compositions of lower quality, which are limited to the words they know they can spell (Joshi et al., 2009). Where children struggle to remember the spelling of words, they use up cognitive space and energy trying to recall these as best they can. Graham and Santangelo (2014) have observed that the more time and attention a pupil spends on any transcriptional skill, the greater the likelihood of interference with other aspects of the writing process.

The National Curriculum (DfE, 2013) and the subsequently published 2018/19 Teacher Assessment Frameworks at the End of Key Stage 1 (STA, 2018a) and Key Stage 2 (STA, 2018b) have brought a renewed impetus for children to learn how to spell correctly. At the end of KS1, the 2018/19 Teacher Assessment Frameworks at the End of Key Stage 1 (STA, 2018a) states that, to be awarded a ‘Working at Greater Depth’ judgement, children should be able to

\[\text{segment spoken words into phonemes and represent these by graphemes,}\]
\[\text{spelling many of these words correctly and making phonically-plausible}\]
attempts at others... spell many common exception words ... and spell most common exception words. (SRA, 2018a:7)

The 2018/19 Teacher Assessment Frameworks at the End of Key Stage 2 (2018b) states that to be judged as ‘Working at the Expected Standard’ (or ‘Greater Depth’), teachers must be confident that individual children meet all the statements of the preceding standard at which children are judged, children must

spell correctly most words from the year 5 / year 6 spelling list and use a dictionary to check the spelling of uncommon or more ambitious vocabulary. (SRA, 2018b:5)

This Minibook presents both theory and ideas for practice. After the initial consideration of relevant research findings about what children need to know about spelling and how to develop such knowledge (Chapters 2 and 3), attention is given to the principles behind the design of a spelling curriculum (Chapter 4). Pedagogical approaches are then suggested (Chapters 5 and 6) before consideration of strategies for assessment (Chapter 7).
